

H. TAN
Evaluation of Instruction Program Report
 21F: MATH 134 DIS 1A: SYSTMS-DIFFNTL EQTN
 No. of responses = 24
 Enrollment = 34
 Response Rate = 70.59%

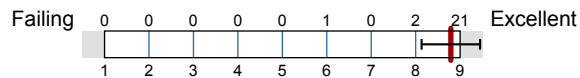

1. UCLA Department of Mathematics:

1.1) How would you rate your TA as an effective teacher?

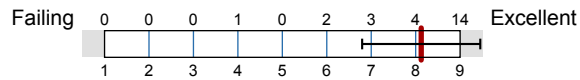

n=24
 av.=8.67
 md=9
 dev.=0.7

1.2) How would you rate the availability and helpfulness of your TA outside of the classroom?

n=24
 av.=8.79
 md=9
 dev.=0.66

1.3) What is your rating of this course independent of the effectiveness of the TA?

n=24
 av.=8.13
 md=9
 dev.=1.33

2. Comments:

2.1) Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Amazing TA. Goes above and beyond to teach us the concepts and very patient with our questions. In my personal opinion, the TA did a better job teaching than the professor.
- Discussion supplement are very helpful and is closely related to the course material. Have a lot of office hours where students are encouraged to ask questions and very detailed and clear explanations are given.
- HK was extremely helpful and made this course very doable for me! I always felt like he was available and willing to help out his students. His discussion supplements were very clear and extremely useful as well. Overall HK was a great TA that really cared about his students and prioritized us.
- HK was very helpful in my success in this class. He reached to me when he noticed that I was struggling at the beginning of the quarter and now I am staying afloat as a fright now. He is very responsive whenever I ask questions through slack and his office hours were really helpful.
- Hong-Kiat's discussion sections and notes are very organized. He uploads the notes and supplementary materials no matter the discussion is canceled. He is also very available at office hours, he held a bunch of additional OH's before the exams. He is a great TA and I'm glad that I had him this quarter!
- I think during the discussions we should probably be spending more time on the material/practice problems to better understand the material. The TA was very good about helping outside of the classroom.

- One of the best TAs I have had! Super helpful in office hours. I especially liked that Hk and Prof often had different ways of approaching problems (kind of equation first vs graph first) and HK would always explain them both. this was very helpful to me to kind of see both techniques and it was informative to see them side by side. Also, he graded the homework so quickly and actually gave feedback. This is not super typical in most of my math classes but it was so nice to just look at your graded work when it was still fresh in your head so you could understand where you went wrong and correct it. HKs discussion sheets were super helpful in synthesizing the material from class and I used them a lot in studying for the exams and when working on the hw. Also very nice and understanding with issues that came up for me which was really appreciated!
- The explanations are clear. Excellent TA
- Very throughout recaps of lectures and grades homework in 1-2 days.
