2.1) Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Good

- HK is easily the best math TA I've had at UCLA (out of the 6 I've had). The discussion supplements are just awesome reference material, and the practice problems he gave us for the final exam were clutch. You can definitely tell he's passionate about the material because he has great energy during discussion sections. The problems he gives us are also a good stepping stone in difficulty, since they are slightly harder than the examples in lecture. I always found myself going to discussion even when I didn't want to. Great job.

- HK is the only reason I was able to finish my homework for this class. I took this class as a replacement for STATS 100A, and I wasn't prepared for the material, but HK's discussions and office hours were very helpful in my understanding every week. He explains things much more clearly than the professor sometimes. Thank you HK!

- HK was very helpful to my understanding of the class material and the homework. In the first discussion session, he gave us the opportunity to decide when his office hours should be, and in the following discussions, he always gave a rundown of his office hours for the week, showing that he truly cares for students in and outside of the classroom. He also always made sure to cover at least 1 homework problem from the previous week. He also hosts his discussions/office hours on zoom for anyone that needs it. One thing I appreciated was that he would always ask if he could erase the board, ensuring that everyone understands the content before doing so. Overall, HK was a fantastic TA and I can definitely recommend him to anyone planning on taking his section.

- Hong Kiat is the GOAT he really cares about his students and his discussion supplements are really helpful

- I think that HK is a great TA, and I appreciate the fact that he provides many resources for us students to use. For example, he always provides us a discussion guide for each week with the concepts and examples he plans to go over during class. He is also always available after discussion section to help answer any questions us students have regarding course content, and he does his best to clear any confusions we have regarding what the professor covered in class. Overall, I would recommend this TA to other students who plan to take this class, as I think he is a wonderful TA.

- I was very scared of this class in the beginning, but I think I understand the material a lot more now because of HK. The discussion supplements, actual discussions, and office hours were all extremely helpful, and I definitely wouldn't have understood the material as much as I do without it. You were so helpful - thank you!!!

- Organized and very helpful

- The TA was really clear in explaining the concepts and would often write really detailed step by step homework solutions (after it was due). This helped me understand where I went wrong, or the alternative method I could have used to get the solution.

- The TA was really helpful, not just to me and the other students in his section, but to the class in general. He wrote up explanations and examples for all the students and posted it to Bruinlearn for everyone to use. In discussion, he was very helpful in explaining the concepts.

- This is the best TA I have ever had!! Thank you for explaining the difficult concepts the whole quarter.

- n/a

- very helpful discussions and office hours

Profile

1. UCLA Department of Mathematics:

1.1) How would you rate your TA as an effective teacher?
Failing ———— Excellent   n=16   av.=8.38
