2. Comments:

- 2.1) Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.
- Dr. Tan is one of the best TAs I have ever encountered. He prepares detailed material for discussion sections, and I hold various office hours every week. He should be praised for his hard work and kind attitude toward the students.
 - HK's discussion supplements are unmatched for the level of detail and work put into them. I am simply blown away at how he was on top of the discussions and always had the supplements available each week. He clearly knew what he was doing so that made it a lot easier to learn from him. When doing the homeworks, it was extremely helpful to have the answers with explanations so I could see where my thinking was right or wrong. I could then make adjustments and learn how to properly approach problems thanks to HK's written out responses.
 - He always knows which part of the course we will find difficult and will give more examples of that.
 - I am satisfied with the structure of this class. Although the materials are challenging, they are still manageable. The quizzes also helped me keep on track with the materials. The TA, Tan, is very cool and undoubtedly helpful in providing resources for me to succeed in this class, especially the discussion supplements. One suggestion for improvement is probably to provide more resources for practice problems since I realized that I have attempted a minimal number of questions, and I'm unsure where I can get more practice problems to strengthen my understanding of the materials.
 - I felt that the TA was incredibly effective. The TA went above and beyond in his discussion supplements and discussion sections to truly help students learn and understand the material. He was also incredibly helpful when it came to answering the questions of students.

- Lectures were often dull/boring, in contrast discussion I felt was really helpful and productive. Hong Kiat was enthusiastic, he was clear with both visual and verbal explanations, and he made discussion worth coming to. 10/10 would take him as my TA again.
- Pretty good TA, reviewed concepts from lecture via practice problems. This was helpful since lectures contained more theory and less practice problems.
- Tan is a very helpful TA and I would say one of the best TA I have ever met. Always try to help you for the concept whenever you stuck at somewhere.
- Teaching, grading, and textbook are fine.
- The TA is very helpful in lecture, very available, offers flexible OH, and the notes that he posts are honestly what is keeping me afloat in this course.
- This is an amazing class, thank you.
